5-MINUTE DAILY ENGLISH PODCAST

Weather Vocabulary & Daily Preferences (A1 Beginner Level)

Target Audience: A1 Beginner Learners	**Format:** Monologue Podcast / Video Script	**Duration:** ~5 Minutes

1. Introduction & Theme (00:00 - 00:45)

"Hello everybody, and welcome to 5 Minute Daily English Podcast! You can use this video to train your listening and comprehension as I speak. Today, I am going to talk about the weather. This is an important topic because everybody talks about the weather, and if you are learning English, you need to know how to talk about it."

2. Sunny Days & Heat (00:45 - 01:45)

"Let's start with sunny weather. Sunny weather is my favorite type of weather. When it is sunny outside, I am happy. For me, hot weather is better than cold weather. The heat can be uncomfortable, but for me, that is okay. However, some places are too hot, like the city of Las Vegas in the summer. In really hot cities, you need to stay inside during the afternoon, where most buildings have air-conditioning."

3. Cloudy & Rainy Days (01:45 - 02:45)

"Now let's talk about cloudy days. I hate cloudy days. When the sun is not shining, I feel a little sad. Some cities, like London, are always cloudy, but I need sunshine.

Next are rainy days. For me, rainy days are the worst because I love being outside. When it rains, I have to stay indoors all day. My wife likes the rain when she is inside because she says the sound of rain is calming, but I do not agree. If you go outside in the rain without an umbrella, you get wet. Also, driving in the rain is dangerous because wet streets cause car accidents, so you need to drive slower."

4. Windy & Snowy Weather (02:45 - 03:45)

"Now let's talk about windy days. Wind can be good in a hot city because it cools the city down, but in a cold city, wind makes it even colder. Very strong wind can even cause trees to fall down.

Lastly, let's talk about snow. It does not snow in my city, but in the winter, my family goes to the mountains to ski and snowboard. I do not want to live in a snowy city because life is more difficult in the cold. Some of my students live in cities where the temperature can be minus 20 or minus 30 degrees Celsius!"

5. Storms & Outro (03:45 - 05:00)

"We also have bad storms, like hurricanes, tornadoes, and thunderstorms. I do not like lightning because lightning can be scary.

That is all for today! Leave a comment and tell me: what type of weather do you prefer? Thank you for listening, and I will see you in the next video!"
